|-------------|--------------------------------------------------------------------|
| 00:00-00:27 | Crew wait to recover Boaty on aft deck, with distant view of Boaty |
| 00:27-00:42 | Sea-horizon pan with bergs and mountains                           |
| 00:43-00:49 | View of mountains with aft deck foreground                         |
| 00:50-00:54 | Life ring with "RRS Sir David Attenborough"                        |
| 00:55-01:00 | View of mountains and sea                                          |
| 01:00-01:20 | Crew guide retrieval equipment into water                          |
| 01:21-01:32 | Boaty approaches ship                                              |
| 01:33-01:40 | Lowering crane with distant icebergs                               |
| 01:40-02:42 | Hooking Boaty in the water                                         |
| 02:43-02:48 | Crew working with retrieval equipment                              |
| 02:49-04:32 | Raising Boaty from the ocean                                       |
| 04:33-05:13 | Settling Boaty on deck                                             |
| 05:14-05:43 | Transfer across deck pushed by team                                |
| 05:44-06:05 | Boaty, ALR and National Oceanography Centre branding cutaways      |

### INTERNAL ALR launch on GIANT 4k (Em Newton)

August 2026

This footage still contains **unedited sound**, camera transitions and real-time conversation. It is supplied to partners for **internal editing only**.

Footage of of Autosub Long Range (Boaty McBoatface) being launched from RRS *Sir David Attenborough* from first mission under glacial mélange. The mission was under the mélange that flows from Immikkeertigajiip Takikkattagajiip Kangertiva Fjord.

Perspectives are from Aft deck level (launch level), and the Winch Control Room (where team

were based).

|             |                                                                                                                                                                 |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 00:00-02:04 | Views of ALR1 on deck pre-launch                                                                                                                                |
| 02:05-04:50 | Views of ALR on deck from Winch Control Room, including Sam Smith (NOC) and RRS SDA deck teams preparing.                                                       |
| 04:50-09:54 | View on deck of crane launch of ALR 1, featuring Sam Smith, Rob Grant and SDA deck crew                                                                         |
| 09:55-15:05 | Inside winch control room, as team make final mission commands with ALR – featuring <b>Rob Grant, Sam Smith, Shivan Ramdhanie, Davide Fenucci</b> (background). |

#### **INTERNAL ALR Interview compilation (Em Newton)**
